## No. 4—Population: Urban Centres, 1961 and 1966

Population clusters of 1,000 or more persons having a minimum density of 500 persons per square mile, and some areas of lower population and/or density (e.g. holiday areas, industrial areas) are designated "urban". The boundaries for 1961 have been redrawn according to the new criteria and the populations (partly estimated) are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 may therefore reflect (i) population changes within the original 1961 boundaries, (ii) urban growth beyond the original boundaries, and (iii) the merging of areas.

## Population: Intercensal Estimates

Estimates of the population in the following tables since the Census, 30th June 1961, have been revised with the adoption of a new method of estimating. In this method the population of the State is estimated by adding to the population ascertained at the census the natural increase and the allocation of the net gain to Australia by overseas migration for the State: gains and corresponding losses that result from movements between this State and other States are also taken into account, in so far as they are recorded as transfers of residence under child endowment procedures or Commonwealth electoral procedures, supplemented by results of any special count or sample survey. The previous method of estimating was based on the addition to census population figures of natural increase and all net recorded movement from overseas according to embarkation/disembarkation in this State as well as all net recorded movement by air, rail, sea and bus between this State and other States.

## No. 61—Articles Produced in Factories

The following table gives details of production of a number of articles in South Australian factories.

Because of the necessity of concealing details for individual producers (the Census and Statistics Act requires all such information to be treated as strictly confidential) details concerning a number of major items—e.g. motor vehicles—have been withheld from publication.

Note. Building employment covers all contractors and sub-contractors and employees of contractors, sub-contractors, and government instrumentalities, who on the last working day in the month were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.

## Trade

All statistics shown in Tables 80 to 88 relate to articles shipped direct between ports in South Australia and overseas countries. Oversea exports and imports via other States are NOT included.

Value of outside packages (containers etc.) is included with individual commodities for exports and with the "All other" group for imports.

Details of interstate movements of goods (particularly by road) are extremely difficult to obtain but a few major items which are available are shown in Table 79 below.
